DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent no. 4,496,063 to Ishii et al.

With respect to claims 1-44, Ishii discloses, among other things, a motorized lifter wherein the motorized lifter comprises tongs; a motorized hoist having an electric motor and a computer system controlling the electric motor for controlling the operation thereof.

A stator and rotor are not explicitly stated in the reference but these components are commonly found in electric hoists and therefore would be obvious to one of ordinary skill in the art.

The method steps recited in claims 45-56 would inherently result from the use of the motorized lifter of Ishii et al as advanced above.
